SKILLS

Technical Skills

- Web Development)
- HTML5
- CSS3
- JavaScript (ES6+)
- Responsive Web Design
- Tailwind CSS
- Bootstrap
- React.js (Basic)
- Node.js (Basic)
- Express.js (Basic)
- REST API Integration
- Git & GitHub
- Visual Studio Code
- Figma (UI/UX Design)

Business Skills

- Entrepreneurship
- Business Development
- Sales & Marketing
- Customer Relationship Management
- Negotiation Skills
- Business Communication
- Market Research

PROFILE

Motivated third-year Information Technology undergraduate at Rajarata University of Sri Lanka with a strong interest in software development, web development, artificial intelligence, and UI/UX design. Passionate about learning new technologies, solving real-world problems, and working collaboratively in team environments. Eager to apply technical skills, gain industry experience, and contribute to innovative IT solutions.

EDUCATION

Bachelor of Science (B.Sc.) in Information Technology Rajarata University of Sri Lanka (In Progress)

2024 - Present

- Undergraduate (Year 3)
- Faculty of Applied Sciences
- Department of Information Technology

G.C.E. Advanced Level (A/L) - Commerce Stream

Mo/Mahamathya Science College, Bibile

2021

- Accounting - A
- Business Studies - B
- Information & Communication Technology - B

Key Learning Areas

- Financial Accounting
- Business Management
- Entrepreneurship
- Information & Communication Technology

G.C.E. Ordinary Level (O/L)

Mo/Mahamathya Science College, Bibile

2017

- ICT - A
- Mathematics - B
- Science - B
- English - C
- Sinhala - B
- Business & Accounting Studies - C
- History - C
- Art - C
- Buddhism - B

UNIVERSITY PROJECTS

Intelligent Traffic Sign Recognition System

Technologies: Python, TensorFlow, Keras, OpenCV, NumPy, Matplotlib

- Developed a Convolutional Neural Network (CNN)-based traffic sign recognition system as part of the Introduction to Intelligent Systems course.
- Trained and evaluated the model using the German Traffic Sign Recognition Benchmark (GTSRB) dataset.
- Performed image preprocessing, normalization, and data augmentation to improve model performance.
- Built a deep learning pipeline for traffic sign classification and evaluated model accuracy.
- Collaborated in a five-member team throughout the project lifecycle.

Enterprise Network Design & Security

Technologies: Cisco Packet Tracer, VLANs, DHCP, ACLs, Routing

- Designed and implemented a scalable enterprise network using Cisco Packet Tracer.
- Configured VLANs, DHCP, inter-VLAN routing, firewall rules, and Access Control Lists (ACLs).
- Implemented network segmentation and security policies to secure organizational resources.
- Enhanced network availability with multiple internet connections for critical departments.

Emergency Contact Helper (Android Application)

Technologies: Java, Android Studio, SQLite, RecyclerView, Git & GitHub

- Developed an Android application providing quick access to emergency services and contacts.
- Implemented user authentication, profile management, SOS functionality, and local database management using SQLite.
- Designed a responsive interface following Material Design principles.

Melodynes - Audio Player Mobile Application

Technologies: Flutter, Dart

- Developed a cross-platform audio player application using Flutter.
- Implemented music playback, playlist management, and a modern, responsive user interface.
- Improved multimedia handling and user experience through Flutter widgets.

Collaborative Learning Management System (LMS)

Technologies: HTML, CSS, JavaScript, Tailwind CSS, Git & GitHub

- Developed a responsive Learning Management System as a university team project.
- Designed user-friendly interfaces for students and lecturers.
- Collaborated using GitHub for version control and team development.

AI-Based Skin Disease Detection System

Technologies: Python, TensorFlow, OpenCV

- Developed an AI-powered image classification system for skin disease detection.
- Performed image preprocessing, dataset preparation, and model evaluation using deep learning techniques.

Plant Growth Monitoring System

Technologies: Python, OpenCV

- Developed an image-processing system to monitor plant growth in controlled environments.
- Applied computer vision techniques for image segmentation and automated growth analysis.

This project section presents a strong portfolio for software engineering internships, showcasing experience in AI, mobile development, networking, web development, and computer vision.

Additional Qualifications

- Professional Certificate in Web Development (4-Month Professional Certificate Programme) Informatics Institute of Technology (IIT) - Professional Development Unit (PDU)(Completed)
- Diploma in Information Technology - ESOF Metro College, Monaragala (Completed)
- Diploma in English - ESOF Metro College, Monaragala (Completed)
- English Language Course (Primary & Intermediate) - Wellassa Richway English College(Completed)
- Front-End Web Development - University of Moratuwa (CODL) (Completed)
- Python Programming - University of Moratuwa (CODL)(Completed)
- Python for Beginners - University of Moratuwa (CODL)(Completed)
- Web Design for Beginners - University of Moratuwa (CODL)(Completed)
- Web Development with Freelancing - IT Guru Global(Completed)
- Git: Hands-on Learning Session - Fidenz Academy (Rusl)(Completed)
- Agile Mastery: Empowering Teams for Project Success - Department of Computing, Rajarata University of Sri Lanka(Completed)
- Certificate in ERP Basics with SAP (Business Awareness - Unit 1) - University of Kelaniya & DP Education(Completed)
- Computer Basics - eAcademy(Completed)
- eCommerce Management - eAcademy(Completed)
- Fundamentals of 5G Technology - eAcademy(Completed)
- Joomla for Beginners - eAcademy(Completed)
- Free CSS - eAcademy(Completed)
- Earn Money Online - eAcademy(Completed)

Achievements

- Successfully completed 15+ professional certifications.
- Developed multiple web, mobile, AI, and networking projects.
- Participated in technical workshops and university competitions.
